

#931327-150cc

Adequate arginine, ornithine and tyrosine are important components of efficient metabolism. Arginine is essential for the production of nitric oxide, which supports the body's metabolic processes by relaxing blood vessels and aiding blood flow.*

Bio-Tone's combination of amino acids is involved in the body's metabolic processes (including lipid mobilization) and our added Special Factors Blend with lipotropic factors choline and inositol helps balance fat utilization.*

Store in a cool, dry place, away from direct sunlight.

Packaged with safety seal.
